

VALVE MAINTENANCE NOTICE

The Lewes Board of Public Works will be conducting a "Valve Maintenance Program" throughout the city.

The program will run intermittently throughout the winter months between the hours of 7:00 a.m. to 3:00 p.m.

The purpose of implementing this program is to maintain the water infrastructure.

On Wednesday, November 15, 2017 the Water Department will begin turning valves on Cape Henlopen Drive.

You may experience low water pressure and/or discolored water.

Should you experience discolored water, please let the cold water run. If it does not clear after several minutes, please contact us at (302) 645-6228.

We thank you for your patience during this process.
